visible age reverse facial

Age and the signs of aging on the skin are important concerns for women. To combat this, some turn to cosmetic medicine and invasive methods such as injections... But there is an alternative.

Stimulation of epidermal regeneration by the Age Influx concentrate, smoothing of the skin by the Vibrolissante electrode, then equalization of the dermis by frequency diffusion via the Vibrodermie electrode: three essential steps to visibly and durably fight the signs of skin aging.

Immediately after the treatment and in the hours that follow, you can see effective anti-aging results on the critical areas affected by aging.

The Visible Age Reverse treatment is a world exclusive that can only be found in approved Guinot Beauty Salons: book your appointment and see the results on your facial skin for yourself.

When it comes to beautiful skin, the smallest things can make the biggest difference. SkinPen advanced micro needling can improve your complexion, reducing the appearance of wrinkles and acne scars. The SkinPen state-of-the-art, anti-aging procedure is designed to stimulate your skin's natural ability to repair itself. These cells repair and remodel the tissue, producing new collagen and elastin.

micro-needling treatments

The SkinPen procedure is non-surgical and minimally invasive. A topical anaesthetic cream is applied before treatment to numb the skin's surface and avoid any unnecessary discomfort.

Treatment sessions last an hour. Starting with the application of an active serum, then the SkinPen is moved over the skin, so the micro-needles penetrate the skin smoothly and help with the absorption of the serum.

People often notice healthier looking skin immediately following the first treatment. However, this improves after multiple treatments and after 3 to 6 months as the skin's natural repair process completes.

Following treatment, your therapist will be able to recommend an aftercare regime that will help prolong the results.
